3.2 Customized Software Solutions

Habib Intelligent Software Limited (hisoft) provides Customized Software Solutions to the small and medium enterprises (SME). Out-of-Box functionality of the packaged implementations does not meet the specific business needs of the client. Customized software development, therefore, remains to be the most favored IT solutions activity across organizations. Through customized development, client makes innovative and proper use of technology to derive competitive advantage and create a differentiator.

We deliver offshore software development services in a cost effective manner and can assist you in offshore outsourcing. High levels of commitment, world-class resources coupled with managed requirements have been the key success factors for these engagements.

Our approach involves:

- Managing the requirements gathering and analysis process
- Creating requirement traceability matrices for each engagement and reviewing it continuously
- Strong focus on processes for solution development
- Strong focus on our assets - People
- Following waterfall as well as iterative life cycle development
